**REQUEST AND/OR PROVIDE
INFORMATION AND FEEDBACK TO THE
GIBSON TEAM !**

When Gibson first began in 1968, we wanted to create a boat that could accommodate the entire family, with cruising performance. When we put all the ideas on paper, the 30' Gibson was born. As time passed and the technology developed, Gibson grew as well. Gibson now builds eleven standard models of different styles and sizes as well as customized floor plans to satisfy the boater's dreams. After forty years, the Gibson name exemplifies tradition, quality and performance, and is the fun way to keep the family together. When it comes to comfort, livability and accommodations, nothing in its class will beat a Gibson. Gibson provides a genuine difference; just ask a Gibson owner. Be informed so that you will make the best decision, because deciding to buy a Gibson is easy. Deciding which model is the hard decision. Gibson is built to last, so we know that tomorrow you will be glad you chose a Gibson today.

Gibson

ON THE LIGHTER SIDE...

There once was a guy named Randy in Waco who bought a horse from a farmer for \$100. The farmer agreed to deliver the horse the next day. The next day the farmer drove

up and said, "Sorry son, but I have some bad news ... the horse died." Randy replied, "Well, then just give me my money back." The farmer said, "Can't do that. I went and spent it already." Randy said, "OK, then, just bring me the dead horse." The farmer asked, "What ya gonna do with him?" Randy said, "I'm going to raffle him off." The farmer said, "You can't raffle off a dead horse!" Randy said, "Sure I can, watch me. I just won't tell anybody he's dead." A month later, the farmer met up with Randy and asked, "What happened with that dead horse?" Randy said, "I raffled him off. I sold 500 tickets at two dollars apiece and made a profit of \$998." The farmer said, "Didn't anyone complain?" Randy said, "Just the guy who won. So, I gave him his two dollars back."

Randy grew up and has worked for the government in Waco **for more than 20 years now**. He's the one who figured out how this "bailout" is going to work.
